

Installation Instructions – Mk5/Mk6

**VW Eos (1Q0)
VW Golf (1K0)/(5K0)
VW Jetta (1KM)**

Overview

This article is intended to provide a step-by-step guide for enthusiasts wanting to Install under seat drawers on either driver or passenger seat in their vehicle. Will not work with seats that have powered bottoms due to the motor location. Manual seats and seats with powered lumbar are okay. Install time 30-45 minutes

Difficulty Rating

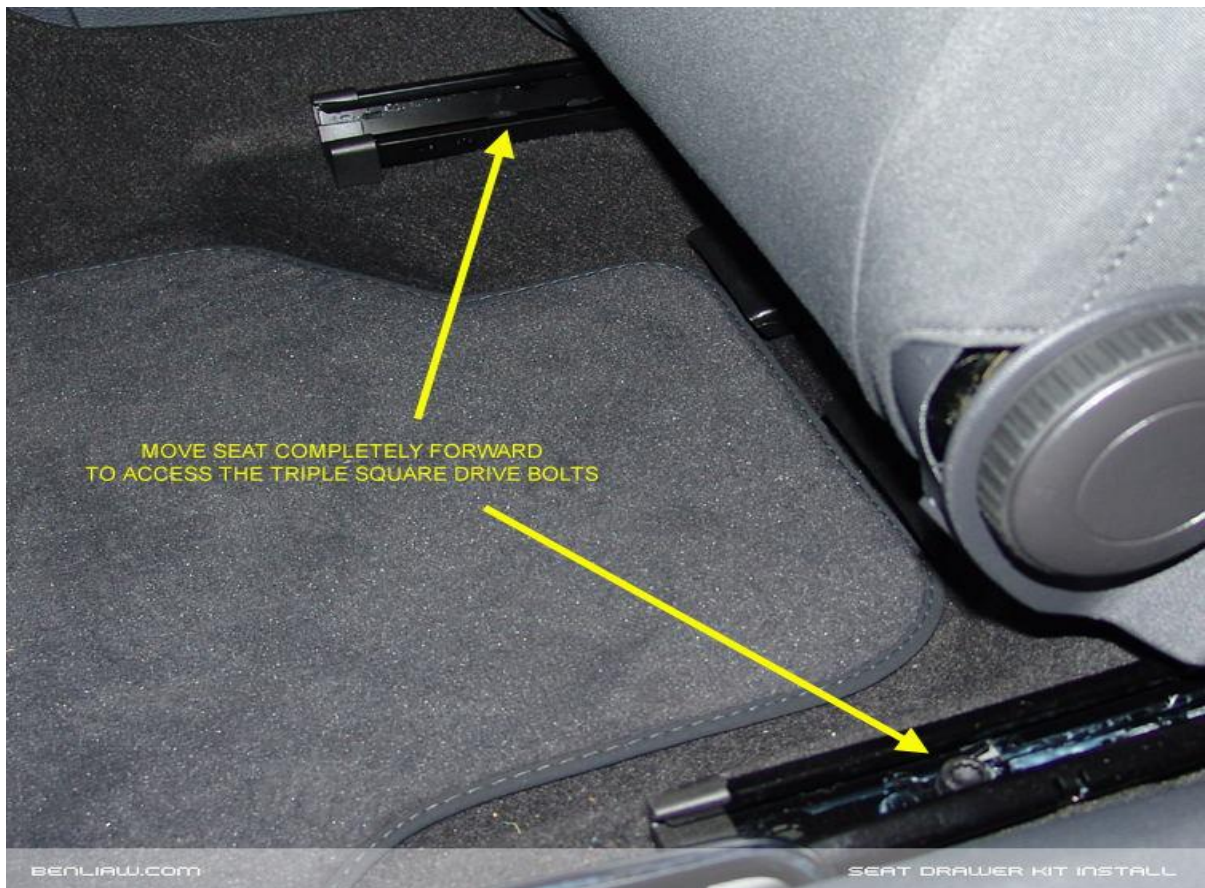

Parts Required for Installation

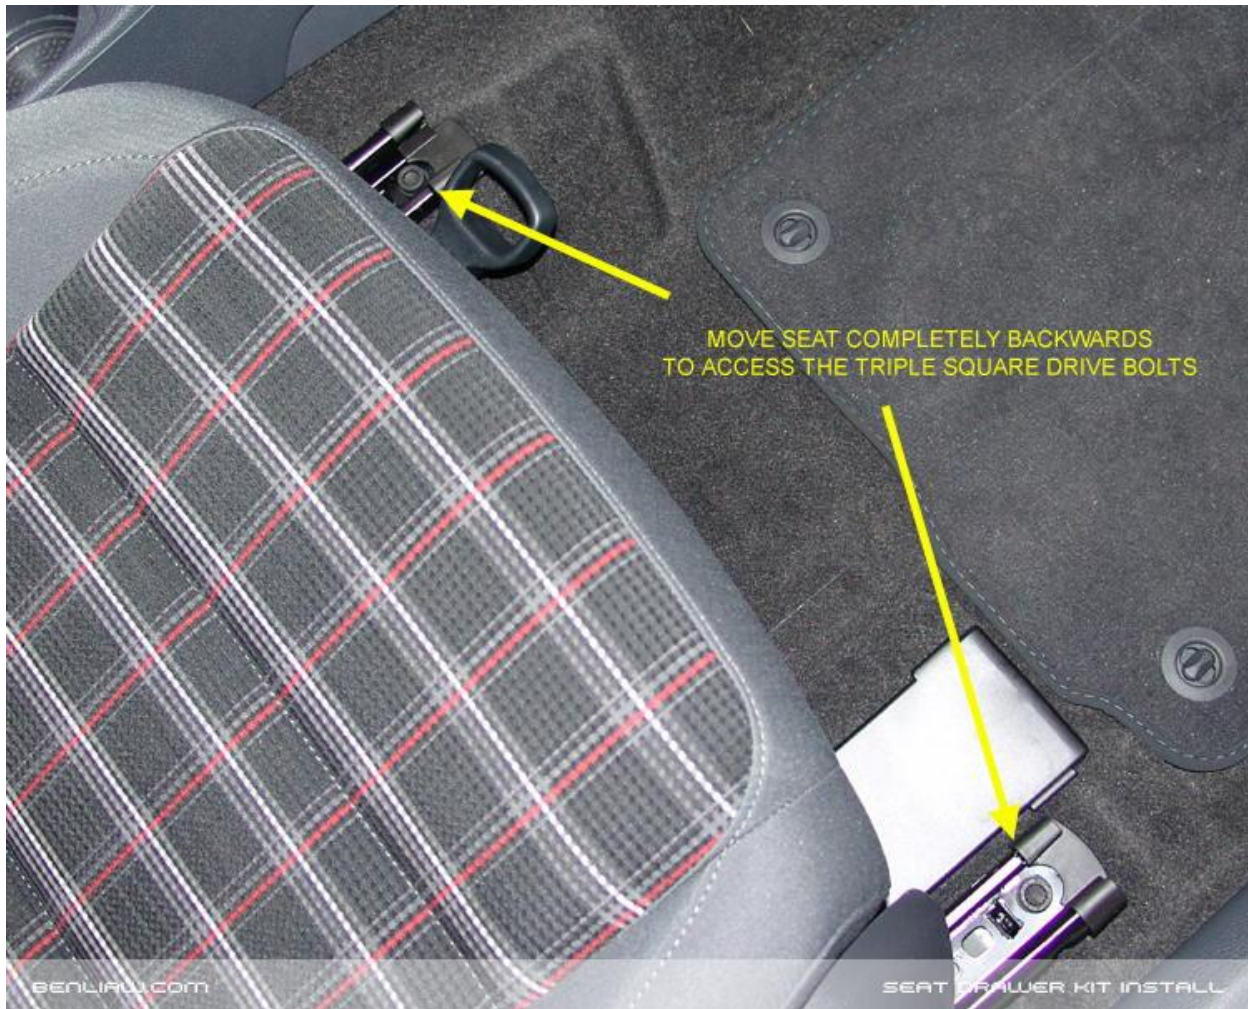

- [Storage - Seat Drawer](#)

Tools Required for Installation

- 10mm Triple Square Socket (can be found on ZDMAK.com)
- Rivet Gun
- T-20 Torx
- Cordless Screwdriver with the ability to attached torx bit with extension (recommend)

Installation

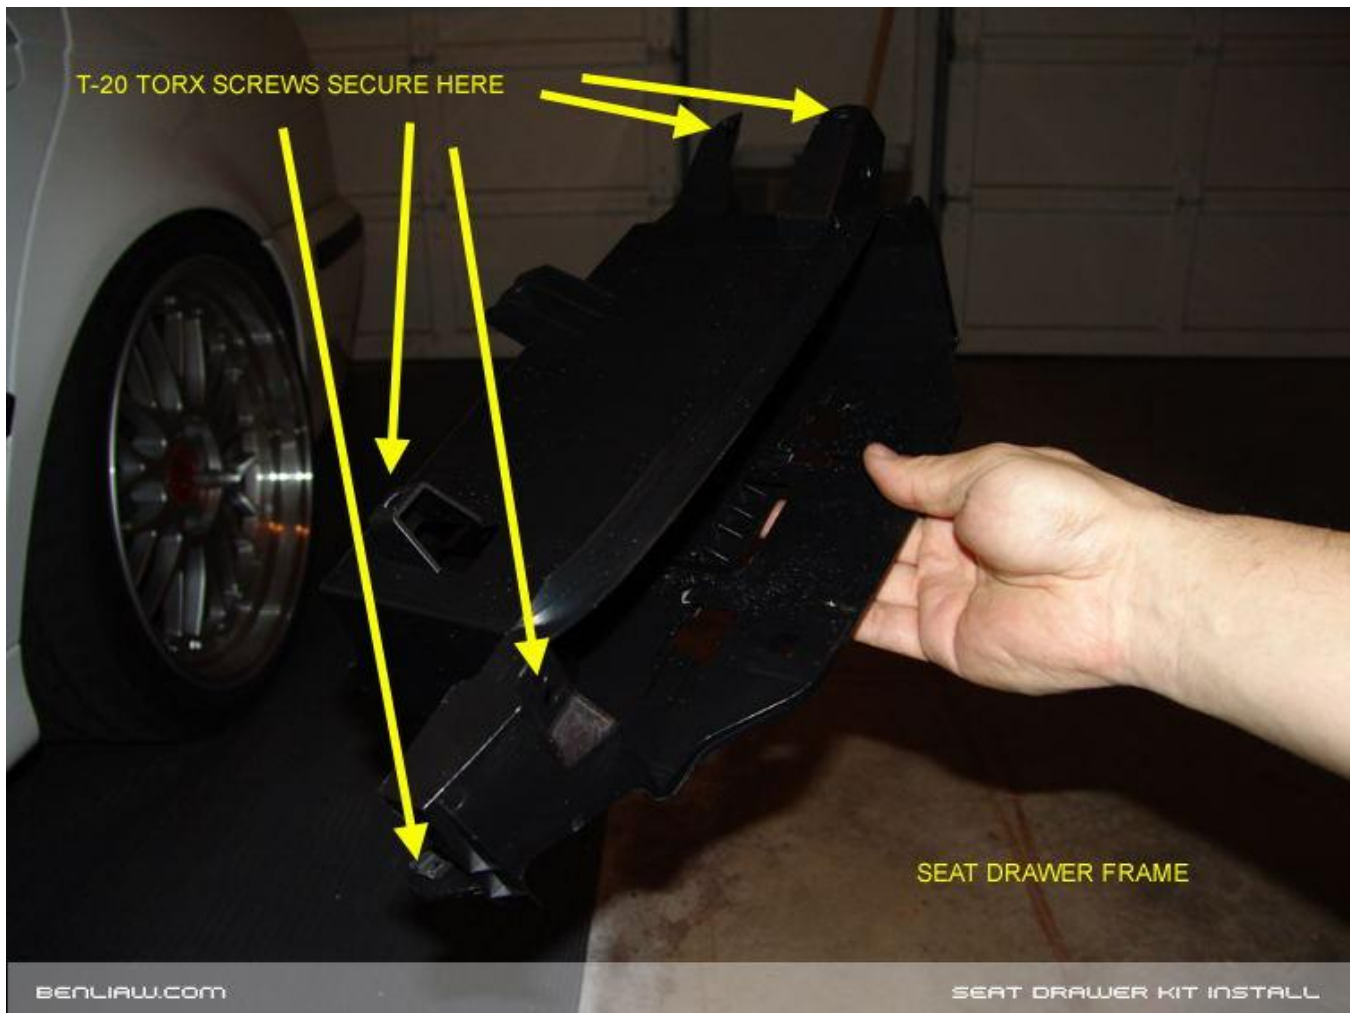

- Take apart seat drawer assembly.

Mk5/Mk6 Seat Drawer

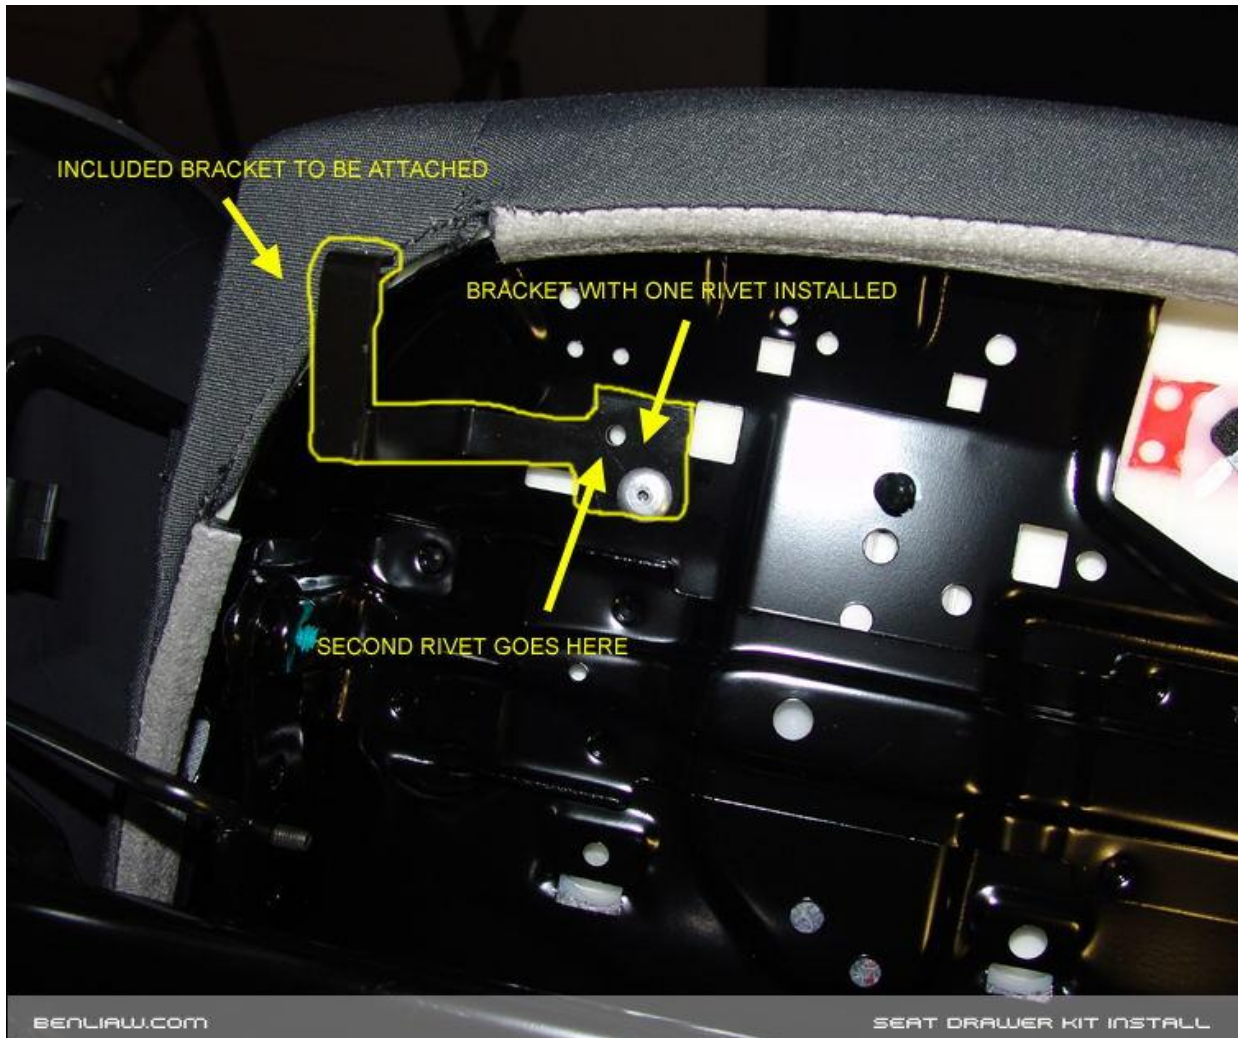

- Attach bracket, then frame.

The screw holes on the bottom of the seat become more obvious, once the frame is put in place. Don't worry about the many, many other holes.

TIP! Using a cordless screwdriver (with torx bit attachment) to secure the frame is **MUCH** easier as you can apply pressure **AND** screw it in at the same time. Otherwise, trying to thread the holes with the screws is much more difficult.
